

Dheeraj Prajapat *Flutter Developer*

📍 Ahmedabad, India ✉ dheerajprajapati334@gmail.com ☎ 08290845089 🔗 iamdheeraj24

📄 Profile

Flutter Developer with 3 years of experience building scalable cross-platform applications for Android, iOS, and Web using Flutter and Dart. Strong expertise in API integration, Firebase, and modern state management solutions. Skilled in writing clean, maintainable code using OOP principles and design patterns. Committed to delivering high-quality, production-ready mobile applications in collaborative team environments.

📁 Professional Experience

Elsner Technologies 🌐, Flutter Developer Apr 2025 – Present | Ahmedabad, Gujrat

- **Trained and mentored Flutter interns**, conducting live demo sessions and practical workshops to strengthen hands-on development skills.
- Implemented **CI/CD pipelines** to automate build processes, accelerating release delivery and improving deployment reliability.
- **Optimized app performance** by resolving Android 14/15 compatibility issues and reducing PDF load time by **50%** using background isolation techniques.
- Contributed to **HRMS application development**, implementing multi-role management and reporting hierarchy functionalities.

Dotsquares Technologies 🌐, Flutter Developer Jan 2023 – Jun 2024 | Jaipur, Rajasthan

- Developed and optimised **cross-platform mobile applications** using **Flutter & Dart**, ensuring high performance, responsive UI, and smooth user experience across Android and iOS platforms.
- Implemented efficient **state management solutions** (Provider/BLoC) and secure **authentication & authorisation flows**, improving app stability and data security.
- Integrated **RESTful APIs, Firebase services, and third-party SDKs**, enabling real-time data updates, push notifications, and seamless backend communication.
- Collaborated with **cross-functional teams** (backend, design, QA) in an agile environment to deliver high-quality features within defined timelines.

Quadtrics Solutions, Android Developer Sep 2021 – Oct 2022 | Mohali, Punjab

- Started as an **Android Developer Intern (6 months)**, gaining strong fundamentals in Android architecture and mobile development best practices, before transitioning into a full-time **Flutter Developer** role.
- Developed and maintained **cross-platform mobile applications** using **Flutter & Dart**, integrating RESTful APIs and Firebase services for real-time data handling and backend communication.
- Implemented secure **authentication systems, API integrations, and push notifications**, ensuring smooth user interaction and reliable performance.
- Improved application stability by applying **debugging best practices, code optimisation techniques, and structured development workflows**.

🧠 Skills

Core Technologies & Frameworks — Dart, Flutter, Firebase, Java & Kotlin

State management & Architecture — BLoC, Provider, MVVM

Analytics & Monitoring — Google Analytics, Sentry

Developer Tools — Dart DevTools, GitHub, VS Code, Android Studio, Xcode, Copilot, Figma

CICD Tools — Github Actions, Fastlane, Shorebird

Testing — Maestro, Unit testing

Projects

WeekMate HRMS - AI DRIVEN HRMS

Oct 2025 – Present

A role-based HR Management System designed to streamline employee lifecycle processes including reporting hierarchy, leave management, and internal approvals. Integrated REST APIs and Firebase notifications to enable real-time updates and structured workflow handling.

Tech Stack: Flutter, Dart, REST APIs, Firebase Cloud Messaging (FCM), Firebase Analytics, Provider/BLoC, SharedPreferences, Deep Linking, Git.

- Contributed to the development of a large-scale **HRMS application** managing employee lifecycle processes, including attendance, leave, reporting hierarchy, and HR operations.
- Implemented and integrated **RESTful APIs** for employee data, reporting structure (Reporting Manager–Employee hierarchy), and HR workflows.
- Developed **role-based access handling** for Employees, Reporting Managers, and HR to ensure secure and structured workflow management.
- Integrated **Firestore Cloud Messaging (FCM)** for real-time notifications related to approvals, updates, and HR announcements.
- Optimised navigation flow and state handling to ensure smooth user experience across complex management hierarchies.

Funky Snake – Gamified Android Application

Jan 2026 – Present

Tech Stack: Flutter, Dart, Firebase (Hosting), Local Notifications, SharedPreferences, GitHub API, CI/CD (GitHub Actions), Fastlane, Git

- Developed a production-ready Snake game using **Flutter**, implementing a 7-Day Streak System and push notification logic with Android 13+ runtime permission handling.
- Designed and implemented a **backend bug-reporting system** where in-app bug reports and suggestions are automatically pushed to GitHub as structured issues using GitHub API integration.
- Built and deployed backend services using **Firebase Hosting and Cloud Console (us-central region)** to handle report processing and API communication.
- Deployed the application on the **web**  with integrated backend APIs for cross-platform accessibility.
- Implemented local data persistence using SharedPreferences and resolved Android-specific lifecycle and notification issues.
- Automated build and release pipeline using **CI/CD (GitHub Actions) and Fastlane**, enabling seamless Play Store deployment and reducing manual release effort.

DevForge - Developer Toolkit (Flutter Web)

Feb 2026 – Present

DevForge is a Flutter Web-based developer toolkit that provides real-time JSON validation, formatting, and automated JSON-to-Dart model generation. It also supports Dart-to-JSON conversion with a responsive, IDE-inspired user interface.

Tech Stack: Flutter Web, Dart, BLoC, Clean Architecture, SharedPreferences, dart:html

- **Designed and structured** a Flutter Web-based developer toolkit using **Clean Architecture and BLoC**, leveraging **AI-assisted development tools** for implementation.
- **Directed and validated** the development of advanced JSON utilities, including **real-time validation, formatting, and automated JSON-to-Dart model generation** with nested parsing.
- **Customised and optimised AI-generated logic** to align with **scalable architecture patterns** and maintain a clean, modular project structure.
- Focused on **feature planning, system design, and UI/UX workflow**, ensuring overall **maintainability and performance optimisation**.

Education

Chandigarh University, Punjab ,
Master's of Computer Applications - 7.04

2019 – 2021
